

THE PEELFIT™ CAN:

a more sustainable solution that's changing the world of metal containers

Peelfit™ cans are the result of a collaboration between packaging leaders Amcor and Crown Holdings.

Crown's Peelfit™ cans use Amcor's CanSeal Pro Direct Seal aluminium membrane directly on the body of the can, removing the need for a separate ring.

The Peelfit™ Can is changing the world of metal containers

Conventional Peelseam™

Peelfit™

Pioneering Direct Heat Seal technology

Directly seals onto plain and PP lacquered cans

Benefits for the customer

No need to change the filling line

Benefits for the end consumer

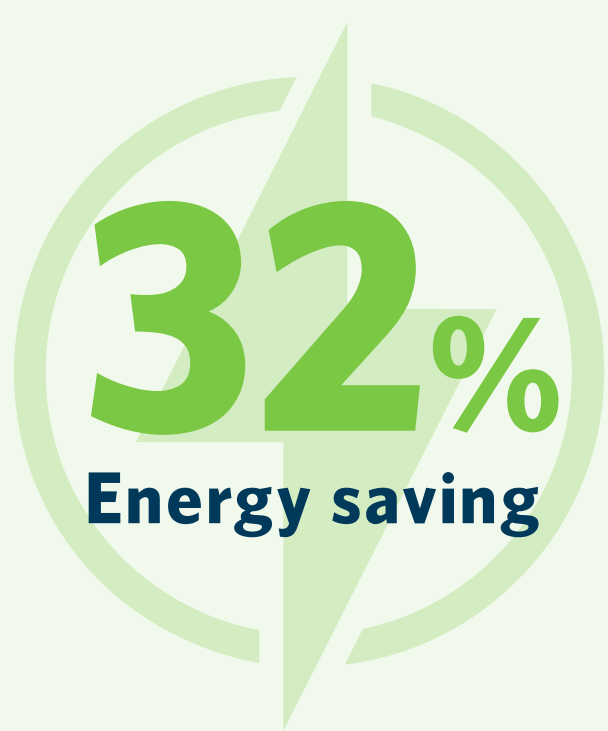

No metal splinters and no sharp edges

Award-winning

2017 Gold DuPont Award for Packaging Innovation
